Kazakhstan

GENERAL INFORMATION

The *International Journal of Geotechnical Engineering* is a quarterly publication of peer-reviewed original papers, technical notes, and book reviews by international scholars covering all topics of geotechnical engineering. The aim of the Journal is to provide high quality papers on recent research and developments that will be important contributions to the literature and to the profession.

Papers from all areas of geotechnical engineering are invited, and practical applications of geotechnical engineering research are particularly of interest. All the papers in the Journal have been refereed by the Editor-in-Chief and anonymous peer reviewers.

The following topics will be covered:

- foundations
- retaining structures
- soil dynamics
- engineering behavior of soil and rock
- site characterization
- slope stability
- dams
- rock engineering
- earthquake engineering
- environmental geotechnics
- geosynthetics
- computer modeling
- groundwater monitoring and restoration
- coastal and geotechnical ocean engineering
