ONE-OF-
A-KIND!

CONSERVATION METHODS
FOR
**Terrestrial
Orchids**

NIGEL D. SWARTS
KINGSLEY W. DIXON

CONSERVATION METHODS FOR Terrestrial Orchids

Nigel D. Swarts, Ph.D., and Kingsley W. Dixon, Ph.D.

"This authoritative and magnificent book is the work of many years of two well-respected scientists in the field who clearly share a life-time passion for terrestrial orchids. It describes breakthrough orchid research that now make it possible to propagate even the most recalcitrant of species."

—Sir David Attenborough, From the Foreword

Orchids are unmatched in their floristic diversity, wide range of growth habitats, and, most importantly, their unique and highly adapted biology and ecology. With terrestrial orchids now among the worlds most threatened plants, the need for conservation is paramount. **Conservation Methods for Terrestrial Orchids** equips orchid biologists, botanists, conservationists, students, and hobbyists with the necessary methodologies to facilitate the conservation of this endangered group of orchids. This first ever comprehensive volume includes background information, techniques, procedures, and relevant case studies on topics such as monitoring, approaches used for mycorrhizal isolation and culture, seed sowing techniques, soil baiting, translocation of propagated plants, pollination, and more.

KEY FEATURES

- Offers methods and techniques that will appeal to multiple end users through its detail, utilization of modern technology, simplicity, and ease of application across species from different parts of the world
- Features beautiful color illustrations and photographs outlining procedures and concepts
- Provides stand-alone guidance in each chapter and collectively enables practitioners to undertake what were previously considered complex scientific procedures
- Includes over 25 relevant case studies to illustrate key principles and success stories in orchid conservation, written by world leaders in orchid conservation practice and science
- Relates many of the techniques and procedures to epiphytic orchids to increase the appeal of the book to all orchid

ABOUT THE AUTHORS

Nigel Swarts, Ph.D., received his undergraduate degree in Environmental Biology at Curtin University. He then completed his Ph.D. with distinction on the conservation of critically endangered orchids at the University of Western Australia. His work has contributed to the development of new approaches to the conservation and recovery of terrestrial orchids based on key biological and ecological requirements for orchid survival. Nigel is currently a Research Fellow at the Tasmanian Institute of Agriculture at the University of Tasmania.

Kingsley Dixon, Ph.D., is Professor of Biology at Curtin University and a visiting Professor at The University of Western Australia and Kings Park and Botanic Garden. Kingsley has published over 400 peer reviewed papers and 13 books, and has been recognized with several awards, including the Australian Orchid Foundation Award of Honour and the international Linnean Medal in Botany. His passion for orchids and their conservation led him to establish the well-known International Orchid Conservation Congress series in 2001.

CONSERVATION METHODS FOR Terrestrial Orchids

TABLE OF CONTENTS

Chapter 1: Introduction to Orchid Conservation

Chapter 2: In Situ Monitoring, Demographics, and Conservation Instruments

- 2.1 Background
- 2.2 Monitoring Methods
- 2.3 Essential Parameters in Demographic Studies
- 2.4 Photo Points as Tools in Monitoring
- 2.5 Recovery Plans for Terrestrial Orchids
- 2.6 International Conservation Instruments

Chapter 3: Orchid Mycorrhizal Associations

- 3.1 Background
- 3.2 Orchid Mycorrhizal Dependency and Nutrition
- 3.3 Identity and Specificity
- 3.4 Achlorophyllous Orchids
- 3.5 Orchid Mycorrhizal Methods
- 3.6 Fungal Culture Isolations
- 3.7 Mycorrhizal Culture Growth and Storage
- 3.8 Media for Fungal Culture

Chapter 4: Orchid Seed Germination Techniques

- 4.1 Background
- 4.2 Mycorrhizal Fungi for Seed Germination of Terrestrial Orchids
- 4.3 Properties of Orchid Seeds
- 4.4 Hand Pollination for Seed Production
- 4.5 Seed Collection
- 4.6 Sowing Mature Seed
- 4.7 Sowing Techniques for Immature Seed

Chapter 5: Assessing Mycorrhiza in Soil

- 5.1 Background
- 5.2 Mycorrhizal Specificity in Soil
- 5.3 Recruitment Limitation
- 5.4 Distribution of Mycorrhiza in Soils
- 5.5 Niche Exploitation and Competition
- 5.6 In Situ Seed Baiting Methods

Chapter 6: Orchid Culture for Conservation

- 6.1 Background
- 6.2 Symbiotic Orchid Propagation
- 6.3 Seedling Development
- 6.4 Transfer to Soil Mix
- 6.5 Pot cultivation
- 6.6 Direct Seeding

Chapter 7: Herbaceous Terrestrial Orchid Translocation

- 7.1 Background
- 7.2 Requirements for Successful Orchid Translocation
- 7.3 Propagation for Translocation
- 7.4 Assisted Migration
- 7.5 Framework for Translocation Projects
- 7.6 Restoring Habitats Suitable for Orchids
- 7.7 Methods for Terrestrial Orchid Translocation
- 7.8 Pre- and Post-translocation Surveying and Monitoring

Chapter 8: Orchid Pollination

- 8.1 Background
- 8.2 Pollinator Limitation

- 8.3 Pollination Strategies
- 8.4 Pollinator Inferences in Conservation Planning
- 8.5 Pollinator Chemistry

Chapter 9: Genetic Techniques in Orchid Conservation

- 9.1 Background
- 9.2 Population Genetics
- 9.3 Molecular Phylogenetics/Systematics
- 9.4 Quantitative Genetics
- 9.5 Mycorrhizal Specificity in Orchid Populations
- 9.6 Considerations in Undertaking a Conservation Genetics Study
- 9.7 Scoring Molecular Data
- 9.8 Analysis of Data
- 9.9 Technical Notes: DNA Extraction

Chapter 10: Storage of Orchid Seed and Mycorrhiza

- 10.1 Background
- 10.2 Securing Collections of High Conservation Value
- 10.3 Seed Quality
- 10.4 Orchid Seedbanking
- 10.5 Vouchering Specimens
- 10.6 Genetic Considerations in Seed Collection Programs
- 10.7 Living Collections as an Ex Situ Conservation Tool
- 10.8 Long-term Storage of Orchid-mycorrhizal Fungi
- 10.9 Alginate Encapsulation of Orchid Seed and Fungus

Chapter 11: References

ORDER FORM

Four Ways to Order

- 1. Mail** Complete this form and mail it with your Check, Credit Card Info, or Purchase Order to:

J. Ross Publishing, Inc.
300 S. Pine Island Road, Suite 305
Plantation, FL 33324

- 2. Telephone** Call us at **954-727-9333 ext. 2**
3. Fax Fax this form or your purchase order to **561-892-0700**
4. Online Visit us on the Web at **www.jrosspub.com**

Attention Professors:

If you wish to consider any book for class adoption, please contact J. Ross Publishing and ask about our Review Program.

Ordering Information:

US: Orders must be prepaid in US dollars or accompanied by a company purchase order. Please add appropriate shipping and handling charges for each book ordered. Florida residents add 7% sales tax.

Canada: Orders must be prepaid in US dollars or accompanied by a company purchase order. Add \$20.00 shipping and handling for the first book and \$7.00 for each additional book.

International: Orders must be prepaid in US dollars. Add \$30.00 shipping and handling for the first book and \$10.00 for each additional book.

Your Satisfaction Is Guaranteed: If this book does not meet your needs, it may be returned to us in saleable condition within 20 days of receipt.

To set up a Bookstore, Association, Cataloger, or Corporate account, contact: Stephen Buda

Tel: 954-727-9333 ext. 5
